

## Call for Abstracts Information

OHBM 2024 is scheduled to take place in Seoul, Korea from June 23 - June 27, 2024. It is preferred that speakers and poster presenters be in-person. *Speakers will be required to pre-record their content in advance (instructions forthcoming)*. Poster presenters will have the option to upload content related to their abstract should they choose to do so including an e-poster PDF and a 3-minute video. We appreciate your flexibility and understanding.

In response to the visa difficulties, we brought the submission slightly forward to allow more preparation time for travel arrangements.

**Submission Deadline: Friday, December 1st, 2023 at 11:59pm EST, USA.**

### Abstract Fee:

Abstract submission fees are required for abstract presentation consideration. There is a non-refundable submission fee of \$35 USD.

### Abstract Guidelines:

1. The OHBM Program Committee expects posters to be at a level that will provide a positive viewing experience for the attendees. When submitting abstracts for the 2024 OHBM Annual Meeting, please consider whether multiple abstracts are truly necessary or if the data you are presenting could be communicated via submission of one abstract.
2. Enter your abstract into the online abstract submission system as you would like it to appear on the OHBM Annual Meeting schedule, and other publications. **Please refrain from using all caps**, unless absolutely necessary (e.g., for acronyms such as MRI, PET, or PRESTO).
3. Abstracts should be formatted to include the following:
  - Title – 100 characters. **Please refrain from using all caps.**
  - Authors and Affiliations – **maximum of 40**
  - Introduction, Methods, Results, Conclusions - 4000 Total Character Limit (includes spaces)
  - Figures (**optional / maximum 2**) - See guidelines below
  - References
4. You will now have the ability to select up to 5 categorical terms ([see list](#)) to best describe your research and/or its application. **IMPORTANT:** After saving your category selections you will be able to indicate a primary and secondary category selection which will be used for review purposes. You are also able to select up to 10 keywords for your abstract. Selection of the subject category determines the expertise of the reviewers who score the abstract; **this is the most important thing to consider when choosing the subject category**. If non-experts in your field review the abstract, it is possible that it will receive a poor score. The chosen category also helps place the abstract in a session with similar research, thereby reaching the right audience at the meeting. The secondary category may be used to assign an abstract to a different reviewer (unlikely) or a different oral or poster session (more likely).
5. A **maximum** of 10 references can be entered per abstract submission. The author-date format is preferred. An example of a correct citation can be found below:

Annas, G.J. (1997a), 'New drugs for acute respiratory distress syndrome', *New England Journal of Medicine*, vol. **337**, no. 6, pp. 435-439.

6. Please include sufficient detail in your methods and results sections to enable readers to have a clear understanding of what data have been collected and what results have been observed. For example, where appropriate please include information on data acquisition, data processing, number of participants tested, quantitative results and statistics, etc.
7. Guidelines for including figures in your abstract:
  - **A maximum of 2 figures can be uploaded.**
  - All figures will be resized to a width of 1000 pixels. Figure aspect ratio proportions will not be altered.
  - Figures should be less than 10 MB in size.
  - Acceptable File Formats include JPG, PNG, and GIF.
  - If you would like to include a brief caption for your figure, please include it with your uploaded figure using the abstract submission system or embed it directly onto the figure.
8. Important Note on Abstract Rejection: Every abstract is reviewed by multiple peer reviewers. Each year, the OHBM rejects a portion of submitted abstracts based on the recommendation of these peer reviewers and the recommendations of the Program Committee. The most common reason for rejection is an abstract that does not contain detailed methods or detailed results (this may not be the case for software demonstrations where the developed software itself is the result of the project). The abstract should describe only work (experiments and analysis) that has already been completed, not work that is planned for the interval between abstract submission and the conference; hence, statements such as "data will be collected" or "data will be analyzed" are grounds for rejection. **Again, abstracts receiving a score of one or below have a high likelihood for being rejected.**
9. You are not required to register for the Annual Meeting prior to submitting an abstract, however, if your abstract is selected for poster presentation, the presenter of the abstract must register for the meeting. You will be notified by email when the Annual Meeting registration site opens in January.
10. The Organization for Human Brain Mapping (OHBM) is committed to the involvement of trainees in its Annual Meetings. To help encourage this, the OHBM will be offering two types of awards. The **Merit Abstract Award** and the **Travel Stipend Award**. Both awards are designed to assist with offsetting the costs associated with traveling to and offsetting the costs associated with attending the OHBM Annual Meeting. The Merit Abstract Award is intended to be awarded to particularly noteworthy abstract submissions whose peer-reviewed scores place them at the topmost tier of trainee abstract submissions. The Travel Stipend Award is specifically intended to help support those persons wishing to attend the OHBM Annual Meeting who reside in countries who are formally recognized to be economically disadvantaged and whose abstracts are also highly rated. Applicants may be able to apply for both the Merit Abstract Award and Travel Stipend Award but will only be eligible to accept one award. ***Applications and information can be found under the author section of the submission process. Applications are only accepted through the submission process and are not offered elsewhere.***

11. **Presentation Release:** By submitting your proposal, you grant permission for the Organization for Human Brain Mapping (OHBM) to distribute the presentation in any format, including video, audio print and electronic text through OHBM OnDemand, social media channels or other electronic media, and on the OHBM website.
