

Dear members of the Brain Mapping community,

OHBM has always been committed to the inclusivity of all participants and this year, a significant step was taken to enhance this commitment as a response to visa related issues for many of our members attending OHBM over the last few years. OHBM Leadership decided to shift the content submission process to an earlier launch date and deadline. This change was made to expedite the acceptance process, particularly for those experiencing this issue. The goal was to ensure that our Annual Meeting is accessible to all, and this adjustment was a testament to that commitment.

Over the last several days, we have heard the request of the community, and as a result, the decision has been made for the **content submission deadline to be extended to Friday, December 1, 2023**. This one-time shift affects all content - Abstracts, Symposia, Roundtable/other submissions, and Educational Courses. Content can be submitted [here](#).

Please review the new timeline below:

- **December 1, 2023:** Submission Deadline @ 11:59pm EST, USA
- **December 8, 2023:** Review Site Opens
- **January 4, 2024:** Review Deadline @ 11:59pm EST, USA

Thank you for your understanding. Please keep reading for the latest news within our thriving OHBM community! With gratitude, I eagerly look forward to continuing to serve the community as Council Chair in the coming year.

Sincerely,

Tianzi Jiang

OHBM Council Chair
